

A GUIDE FROM BRIGHTLINE ELECTRICAL

Quote, work, certificate

Three steps, no surprises, from your first call to the signed-off job.

Brightline Electrical

EWRB-LICENSED ELECTRICIANS, GREY LYNN, AUCKLAND

Registered electricians, certified on every job

Brightline Electrical is a team of registered electrical workers, EWRB licensed, working across Auckland homes and small businesses. We handle EV charger installs, switchboard upgrades, LED lighting, fault finding and repairs, and solar and battery connections — done tidily, with every circuit tested before we pack up. Every job finishes with a Certificate of Compliance, so you have the paperwork before we leave. We're an approved Tesla Wall Connector installer, and we work just as readily with Wallbox, Zappi and Schneider Electric gear.

01

Home EV charging, certified and ready to use

Registered electricians install Tesla, Wallbox and Zappi chargers in Auckland homes and small businesses, wired safely and signed off with a Certificate of Compliance.

What your EV charger install covers

Site assessment

We check your switchboard capacity and cable run before quoting, so the price reflects your actual home.

Wall Connector fitting

Tesla, Wallbox and Zappi chargers mounted on your garage or driveway wall and wired to a dedicated circuit.

RCD protection

Correct circuit protection fitted to keep your home and vehicle charging safe.

Certificate of Compliance

Every install is certified on completion, so you have the paperwork for your records or insurer.

02

An overloaded switchboard, replaced and certified

Registered electricians upgrade ageing or overloaded switchboards for Auckland homes and small businesses, with a Certificate of Compliance issued on every job.

What your switchboard upgrade includes

New board & RCDs

We replace the old board with a new switchboard fitted with RCD protection to current safety standards.

Circuit testing

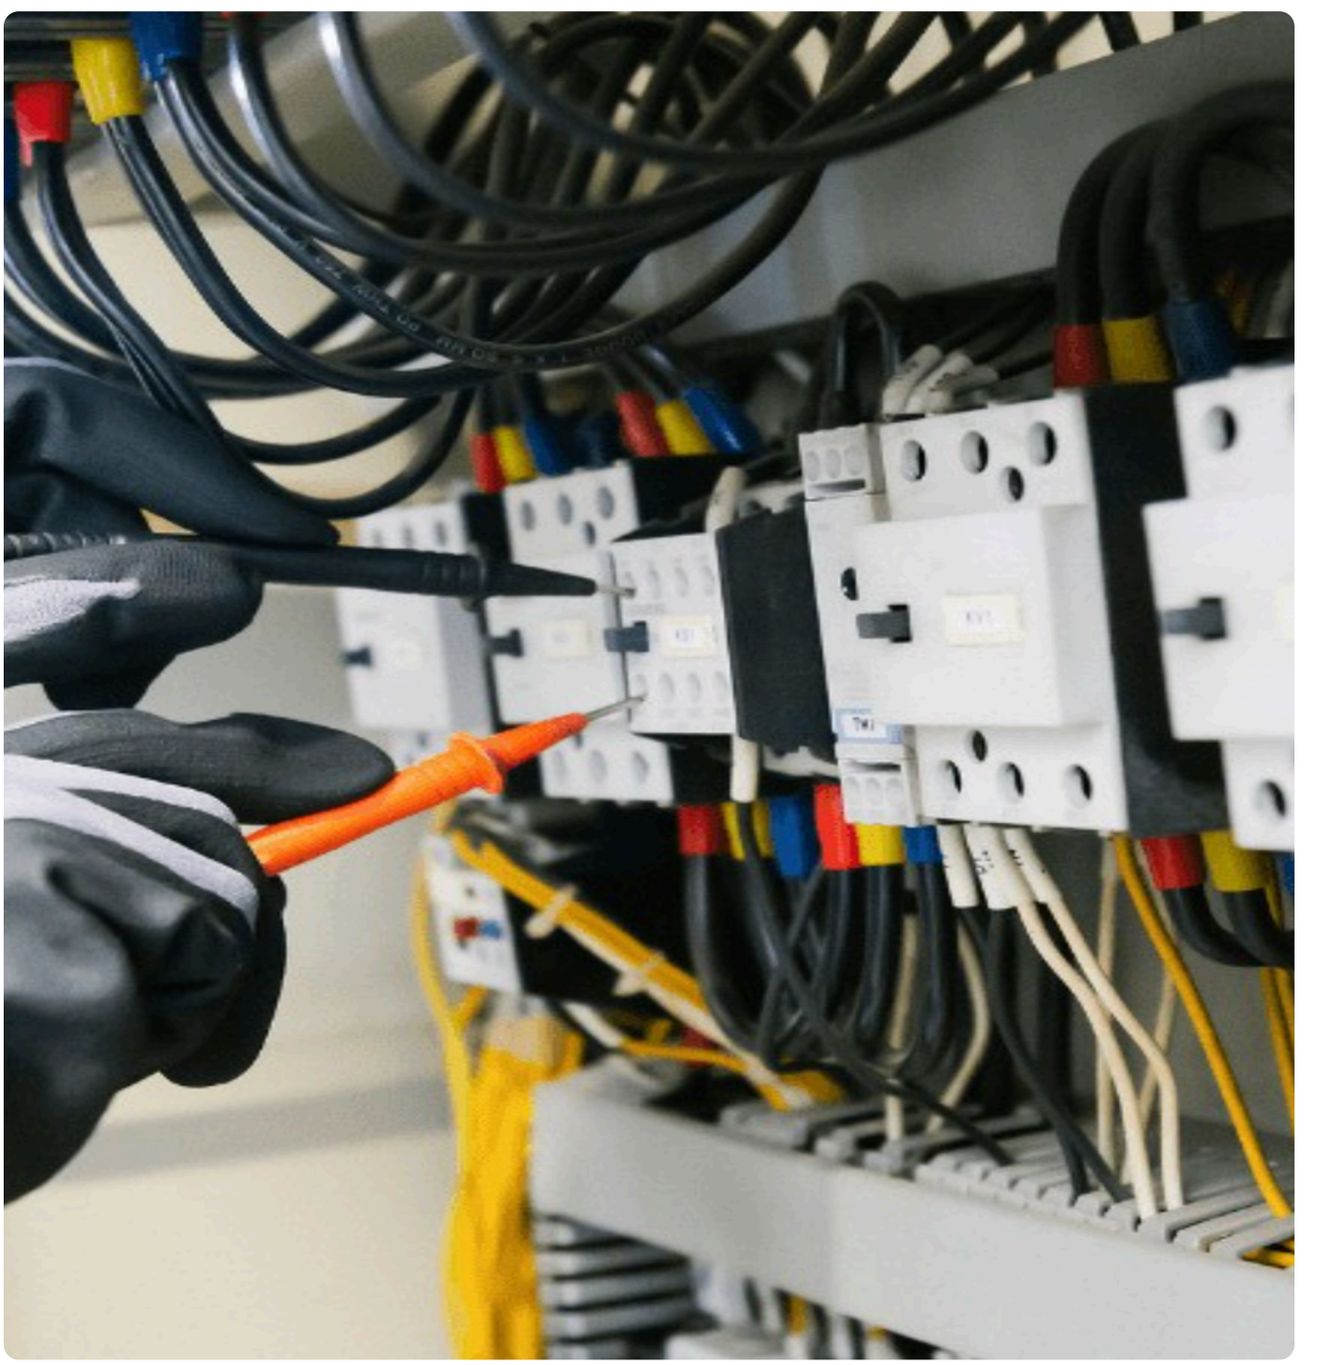

Every circuit in the house is tested and labelled, so you know what each breaker controls.

EV and solar ready

Boards are sized with room for EV chargers, solar and battery connections you might add later.

Certificate on completion

A Certificate of Compliance is issued once the upgrade is finished and tested.

03

Brighter rooms, lower power bills

LED upgrades for Auckland homes and businesses, fitted by registered electricians and certified on completion.

Every job certified, every time

EWRB licensed electricians

Every job is wired by registered electrical workers, EWRB licensed.

Certificate of Compliance

A Certificate of Compliance is issued on every job, so your LED upgrade is signed off and on record.

Certified work, no surprises

EWRB licensed

Every electrician on the job is a registered electrical worker, licensed with the EWRB.

Certified every time

A Certificate of Compliance is issued on every job, so the work is signed off and on record.

Tesla approved installer

Approved to install Tesla Wall Connectors, plus Wallbox, Zappi and Schneider Electric equipment.

Auckland wide, Mon–Fri

Based in Grey Lynn and working across Auckland, Monday to Friday, 7.30am to 5pm.

HOW IT WORKS

Quote, work, certificate

1 Tell us the job

Call or send details of the job — EV charger, switchboard, lighting or a fault.

2 We do the work

A registered electrician arrives, completes the job tidily and tests everything.

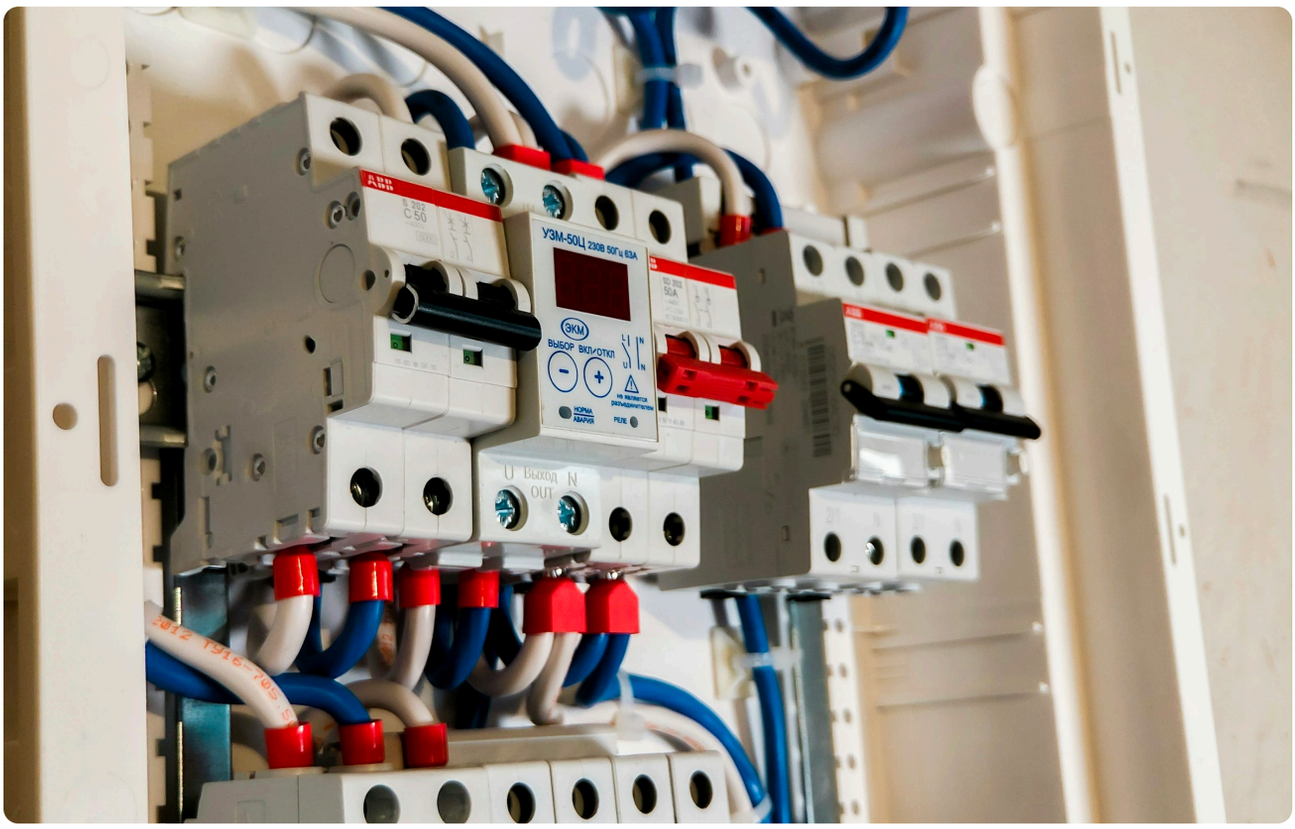

3 Certificate issued

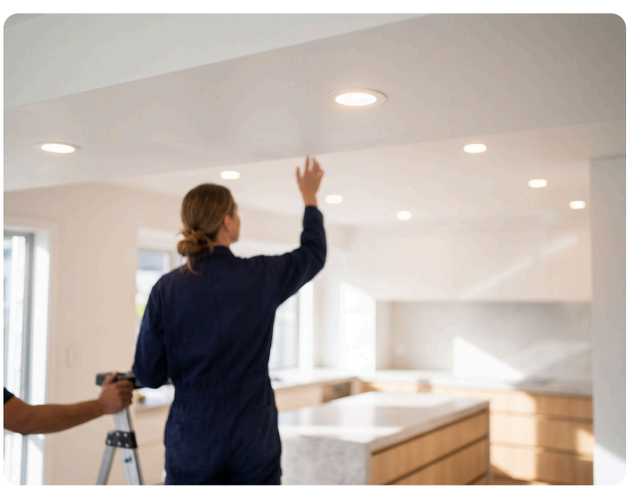

A Certificate of Compliance is issued on completion, so the job is signed off.
