

WHY ATELIER NORTH

Designed around how you live

Every project starts from the same questions: where does the light fall, and how will this space actually be used.

Natural light
Rooms are planned around daylight, orientation and the way the Toronto seasons move through a site.

Honest materials
Material choices that age well and read clearly, with nothing applied and nothing hidden.

Licensed architects
Licensed by the Ontario Association of Architects, working to its standards of care.

Recognized design
Winner, Toronto Urban Design Award 2022.

HOW WE PRACTISE

Design that answers to the client

Every project starts with how a space is actually used, then earns its form from that.

SERVICES

What we design

Four ways we work with homeowners and developers across Toronto.

Custom homes

New houses planned around site, orientation and daylight, from first sketch to completion.

Renovations and additions

Rear additions, second storeys and whole-house renovations that open a home to light.

Interior architecture

Full interior fit-outs where material, light and layout are considered together.

Small commercial

Street-level retail and studio spaces designed for daylight, flow and honest materials.

OUR PROCESS

How we work together

From first conversation through to construction, here is what to expect.

01 **Initial conversation**
We meet to discuss your site

02 **Concept design**
We develop sketches, massing studies and material directions that respond to light

03 **Drawings and permits**
We prepare construction drawings and coordinate permit submissions with the City of Toronto, working alongside your contractor.

04 **Construction support**
We stay involved through construction, visiting site and answering questions, so the built work matches the drawings.
