Learn to read the night sky, from your first constellation to radio telescopes and white dwarfs.

$99.00

TAUGHT UNDER SOME OF THE DARKEST SKIES

Dark Arizona skies

Taught under some of the darkest skies in North America, from Flagstaff, the world's first International Dark Sky City.

A working astronomer

Learn from an astronomer who runs public star parties in Flagstaff.

Three skills, one path

Build from night-sky navigation to binoculars to your first telescope.

Learn online, any time

Study whenever you like - the school is open online any time.

HOW IT WORKS

HOW TO GET STARTED

1

Choose a course

Browse the courses on night-sky navigation, binocular astronomy and first telescopes.

2

Enroll online

Sign up any time - the school is open online, day or night.

3

Learn at your pace

Work through each course on your own timeline, from wherever you are.

QUESTIONS BEFORE YOU START

Do I need a telescope to start?

No. You start with night-sky navigation using just your eyes, then move on to binoculars before your first telescope.

What level of experience do I need?

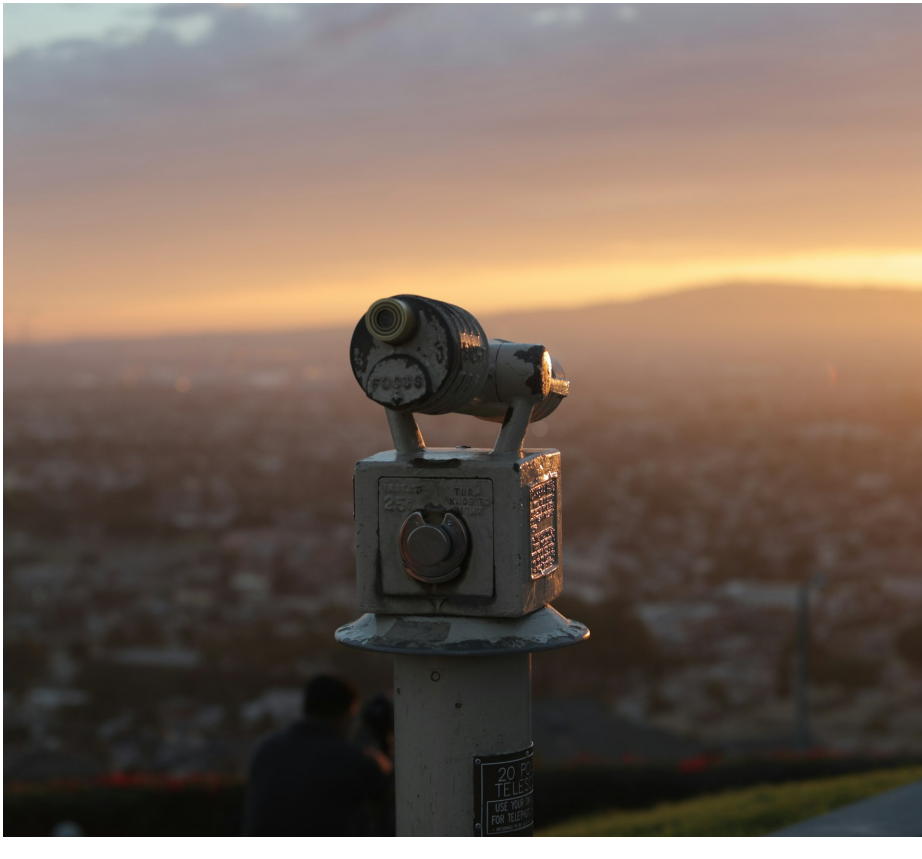
None. The courses begin with simple sky navigation and build step by step toward binocular astronomy and first telescopes.

How are the courses taught?

Dark Sky Field School teaches entirely online, so you can learn from wherever you are.

Can I learn at my own pace?

Yes. The school is online any time, so you work through each course on your own schedule.



FIND YOUR WAY UNDER THE STARS
