Atelier North Architects

ARCHITECTURE STUDIO · TORONTO

Houses and spaces shaped by light

We design custom homes, renovations and small commercial spaces across Toronto, with natural light, honest materials and close attention to how people live.

What we design

Four ways we work with homeowners and developers across Toronto.

Custom homes
New houses planned around site, orientation and daylight, from first sketch to completion.

Renovations and additions
Rear additions, second storeys and whole-house renovations that open a home to light.

Interior architecture
Full interior fit-outs where material, light and layout are considered together.

Small commercial
Street-level retail and studio spaces designed for daylight, flow and honest materials.

OUR PROCESS

01
Initial conversation
We meet to discuss your site

02
Concept design
We develop sketches, massing studies and material directions that respond to light

03
Drawings and permits
We prepare construction drawings and coordinate permit submissions with the City of Toronto, working alongside your contractor.

04
Construction support
We stay involved through construction, visiting site and answering questions, so the built work matches the drawings.
