OUR SERVICES

Brightline Electrical

Electrical work for Auckland homes and businesses

From EV chargers to switchboards, every job is certified on completion.

EV charger installation

Tesla, Wallbox and Zappi chargers installed and certified for home or office charging.

Switchboard upgrades

Old fuse boards replaced with a modern switchboard and RCD protection

LED lighting

Energy-efficient LED lighting fitted throughout your home or business, wired tidily.

Fault finding and repairs

Tripping breakers, dead power points and flickering lights found and fixed fast.

Solar and battery connections

Solar panels and battery storage connected and certified by a registered electrician.

HOW IT WORKS

1

Tell us the job

Call or send details of the job — EV charger, switchboard, lighting or a fault.

2

We do the work

A registered electrician arrives, completes the job tidily and tests everything.

3

Certificate issued

A Certificate of Compliance is issued on completion, so the job is signed off.
